PRODUCT DATA SHEET

Q8 Heller 22

Advanced zinc-based hydraulic oil with high viscosity index

Description

Q8 Heller 22 is suitable for an extensive range of applications and temperatures. The high viscosity index of >160 exceeds the industrial standard which results in an oil with outstanding flow properties. Thanks to the high oxidation stability, drain intervals and lubricant life are significantly extended. Q8 Heller 22 is used for demanding applications that require high viscosity index oils.

Applications

Q8 Heller 22 is suitable for all season applications such as off-highway equipment. It is also used in industries and applications requiring high viscosity index oils, like paper, steel, cement or mining industry.

Benefits

- *Extensive oil drain interval for a longer lubricant lifetime*
- *Lower downtime and an improved maintenance efficiency*
- *Outstanding oxidation stability*
- *Highly appropriate for use in a wide range of temperatures*
- *Excellently high viscosity index*
- *High protection against wear*
- *Optimum separation of water*
